PUP 494/598 Innovation and Alternative Transportation

Second Summer Session: Tuesday/Thursday 4:50-8:00

This course will explore innovations in transportation (e.g. autonomous vehicles, etc.) and alternative transport modes (non-car related), with an emphasis on the future and understanding their potential impacts in coming years. We will examine the ways in which transport innovations may change the way we live and travel in cities, and the future of alternative transportation modes given these technological innovations and their potential impacts on urban form.
