Program Description

Coursework in the BSD in interior design examines the context and spaces in which individuals and groups live and work.

Interior designers create environments within buildings that meet the physical and psychological needs of individuals and institutions, providing a useful, rich and rewarding environment for their lives. Interior design involves the design of space, equipment and furniture. It requires substantial technical and organizational understanding; sensibility to form, lighting, color and texture; and an awareness of design history and theory.

All students who are admitted to the major must pass a degree milestone at the end of the first year to continue in the major. For more information on the milestone process, students should visit https://design.asu.edu/resources/students/milestones.

This is an 8-semester program requiring sequential completion of studio coursework (or approved equivalent) at any point of entry.
