Students interested in pursuing a minor should consult their academic advisor to declare the minor and to ensure that an appropriate set of courses is taken. Minor requirements appear on the degree audit once the minor is added. Certain major and minor combinations may be deemed inappropriate by the college or department of either the major program or the minor. Courses taken for the minor may not
count toward both the major and the minor. Students should contact their academic advisor or the

Career Opportunities

A minor can help students enhance the marketable skills they acquire in their major program and help
them develop new skills apart from it, though most career areas do require more training than a minor
alone can provide.

The ability to understand the way media functions is vital to many industries. As a result, a minor in
media analysis helps students as they pursue media roles across communication, journalism and
fact-checking, as well as career opportunities in economics, finance and political organizations.
