ASU's Mary Lou Fulton Teachers College is one of the top-ranked graduate colleges of education in the U.S. We understand that the creativity that fuels the great innovations of our time is the same force that animates great educators. Our graduate programs develop collaborative leaders who bring people and ideas together to improve systems and strengthen communities.

Program Description

Degree Awarded: MEd Educational Technology

The MEd program in educational technology emphasizes the design of learning technology environments, systems, applications and instructional materials for multiple learning contexts. The program prepares learning design and technology professionals for a variety of settings, including business and industry, and for formal and informal educational settings, such as K-12 and higher education, museums, and nonprofit and government organizations.

Through projects that address real-world, authentic problems, students will apply current research and learning theories, along with the use of emerging technologies, to the practice of learning and instructional design. All courses are online and combine a range of resources and technologies to facilitate direct interaction between students, program faculty and classmates. Program graduates will be prepared with the knowledge and skills required to address real-world problems and emerging design challenges through the process of learning design.
