Actuarial Science, MS

LAACMTS

Program Description

Degree Awarded: MS Actuarial Science

The MS program in actuarial science builds on the strength, experience and reputation of ASU. While keeping the core technical learning outcomes in place, it also includes a new, focused set of professional learning outcomes aligned with the needs of the ever-evolving insurance industry. These guide students' development of professional competencies through coursework, independent projects and opportunities outside of the classroom, while remaining firmly based on a strong foundation of scholarly technical work in actuarial science. The program emphasizes broad awareness and appreciation of current issues faced by insurance industry practitioners as well as innovative resolutions provided by actuaries.

Actuaries must pass a series of intensive professional exams to become credentialed, and this degree program prepares students for these credentialing exams.

Accelerated Degrees

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's and master's degree with:

Actuarial Science, BS

Acceptance to the graduate program requires a separate application. During their junior year, eligible students will be advised by their academic departments to apply.

Degree Requirements
30 credit hours including an applied project (ACT 593)

**Required Core (6 credit hours)**
ACT 560 Advanced Data Analytics in Insurance I (3)
ACT 561 Advanced Data analytics in Insurance II (3)

**Electives or Research (21 credit hours)**

**Culminating Experience (3 credit hours)**
ACT 593 Applied Project (3)

**Additional Curriculum Information**
For electives and research, students select seven courses from an approved list. Students should see the academic unit for the approved course list. Other courses may be used with approval of the academic unit.

Only 6 credit hours of 400-level coursework will be allowed on the plan of study per Graduate College policy.

---

**Admission Requirements**

An applicant must fulfill the requirements of both the Graduate College and the College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's degree (or equivalent) or master's degree from a regionally accredited college or university in a related field such as mathematics, statistics, business, economics and predictive analytics.

Applicants must have a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in the last 60 hours of a student's first bachelor's degree program, or applicants must have a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in an applicable master's degree program.

**All applicants must submit:**

1. graduate admission application and application fee
2. official transcripts
3. letter of intent or written statement
4. GRE scores
5. two letters of recommendation
6. professional resume
7. proof of English proficiency
**Additional Application Information**

An applicant whose native language is not English (regardless of current residency) must provide proof of English proficiency.

Applicants should have completed the following courses with a "B" or better (scale is 4.00 = "A"). ASU equivalents are given in parenthesis. Courses may be substituted with approval of the academic unit.

- Linear Algebra (MAT 342 or MAT 343)
- Calculus Sequence 1-3 (MAT 270, 271, and MAT 272)
- Applied Statistics (STP 420)
- Advanced Calculus (MAT 370 or MAT 371)
