This program's name has changed effective Fall 2019. The previous name was Aging and Lifespan Development.

**Program Description**

**Degree Awarded: MS Aging**

The MS program in aging is aligned with ASU’s charter and design aspirations in assuming responsibility for the overall health of communities, fusing intellectual disciplines, transforming society by connecting to social needs and being socially embedded through partners in the aging network of health and social services, as well as through entrepreneurs developing senior-related business ventures. The program provides students with advanced, interdisciplinary knowledge that focuses on improving the well-being of older persons, in the context of their diverse families and communities. Curriculum addresses the multidimensional aging process, the needs of aging populations and their potential contributions; reflects national health initiatives; and encourages community collaborations that are reciprocal, beneficial and sustainable to improve health outcomes.

**At a Glance**

- **College/School:** [Edson College of Nursing and Health Innovation](#)
- **Location:** [Downtown Phoenix campus](#)

**Degree Requirements**

36 Credit Hours including the required course (ALD 593) and an Applied Project, or
36 credit hours including the required applied project course (HCA 593)

**Required Core (15 credit hours)**

- HCA 501 Perspectives on Aging and the Life Course (3)
