Anthropology, Minor

LAASBMIN

Human behavior --- what is embedded and what is learned? Understanding how and why people act the way they do will complement whatever major or career you pursue. A minor in anthropology will allow you to harness the lessons of humankind's past to illuminate its future.

Description

The minor program in anthropology provides students with a great deal of flexibility in selecting courses. The program has been designed to allow students to focus on areas within the discipline that articulate well with their major. All students interested in the anthropology minor are encouraged to discuss the available options with a School of Human Evolution and Social Change undergraduate advisor.
