Biology (Biology and Society), MS

LABIOSMS

As a master's degree student in this concentration, you'll choose courses and research aligned with your interests as you explore how life sciences are shaped and influenced by society. Choose from several study focus areas, from bioethics and policy to the history of science and environmental studies.

Program Description

Degree Awarded: MS Biology (Biology and Society)

In the biology and society concentration of the MS program in biology, students examine topics where biology intersects with society. The concentration tailors individual plans of study to individual needs and interests, with a solid grounding in life and related sciences and with a rigorous analytical and interdisciplinary education. The program offers suggested courses for those wishing to focus on these areas: bioethics, policy and law; biology education research; ecology, economics and ethics of the environment; and history and philosophy of science.

The bioethics, policy and law area trains students in the pressing moral, policy and legal issues raised by the biosciences and biomedicine and in the disciplinary methods necessary to address these issues. The biology education research area focuses on using education research to identify ways to improve undergraduate biology education broadly. Ecology, economics and ethics of the environment trains students in the theory and empirical methods for understanding, analyzing and shaping policy for coupled human-natural systems. The history and philosophy of science area trains students in the conceptual foundations of science, especially the epistemological and methodological assumptions that shape science and its progress.

Accelerated Degrees

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's and master's degree with:

- Biological Sciences, BS
- Biological Sciences (Biology and Society), BS
- Biological Sciences (Conservation Biology and Ecology), BS
- Biological Sciences (Genetics, Cell and Developmental Biology), BS
- Biological Sciences (Neurobiology, Physiology and Behavior), BS

Acceptance to the graduate program requires a separate application. During their junior year, eligible students will be advised by their academic departments to apply.

Degree Requirements

30 credit hours and a thesis

An individual student plan is developed in consultation with the student's advisor and committee.

Admission Requirements

Applicants must fulfill the requirements of both the Graduate College and the College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. academic record form
4. personal statement
5. curriculum vitae or resume
6. writing sample
7. GRE scores
8. three letters of recommendation
9. proof of English proficiency

Additional Application Information
Students are expected to have completed the equivalent of core requirements for an undergraduate major in biology or a related discipline (typically evolution, genetics and other courses appropriate to the student's particular interests). Students without an undergraduate-level competency in the sciences may be considered for conditional admission to the biology and society concentration.

An applicant whose native language is not English (regardless of current residency) must provide proof of English proficiency
