Are you interested in quantitative sciences, but also have a passion for understanding life? As a biophysics major you'll be exposed to novel learning methods and laboratory experiences, with additional opportunities to participate in real biophysics research and work directly with faculty in the field.

Program Description

Biophysics uses the methods and theories of physics to study biological systems.

The BS in biophysics is a transdisciplinary program providing students with a working understanding of the important principles of physics, chemistry and biology that govern all scales of biological organization from the molecular processes of life to organisms and ecosystems.

At a Glance

- **College/School:** [The College of Liberal Arts and Sciences](#)
- **Location:** [Tempe campus](#)
- **Additional Program Fee:** Yes
- **Second Language Requirement:** No
- **First Required Math Course:** MAT 270 - Calculus w/Analytic Geometry I
- **Math Intensity:** Substantial

Admission Requirements

General University Admission Requirements:
All students are required to meet general university admission requirements.

Freshman | Transfer | International | Readmission

Change of Major Requirements

Current ASU students wishing to change their major to physics should have a minimum cumulative GPA of 2.50 (scale is 4.00= "A") for all critical classes they have completed.

Students should refer to https://changemajor.apps.asu.edu for information about how to change a major to this program.

Transfer Options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU™ to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and help students save time and money in their college journey. Students may learn more about these programs by visiting the admission site: https://admission.asu.edu/transfer/pathway-programs.

Global Opportunities

Global Experience
Study abroad affords students the opportunity to gain valuable experience in a diverse set of programs in a variety of countries around the world. Students are able to study biophysics abroad through a wide set of opportunities related to physics, chemistry and biology.

Graduates who possess the heightened skills in communication, critical thinking and leadership they acquired through study abroad may stand out in a competitive field. https://goglobal.asu.edu/

Career Opportunities

The broad range of applicability of the principles of biophysics gives great flexibility in a choice of career or further education including:

- chemical industries
Career examples include but are not limited to those shown in the following list. Advanced degrees or certifications may be required for academic or clinical positions.
