Biological Sciences (Neurobiology, Physiology and Behavior), BS

LABSCABS

Are you interested in animals and animal behavior? Do you plan to enter the neuroscience field, apply to medical or veterinary school or conduct biomedical research? This concentration helps you build strong foundations in biology, chemistry, physics and math to get you started toward your goals.

Program Description

The neurobiology, physiology and behavior concentration serves students in the BS program in biological sciences with a broad yet rigorous education.

While it might seem that neurobiology, physiology and behavior are quite separate fields, the three interact extensively in living organisms to achieve common goals. By studying neurobiology, behavior and physiology from the perspectives of molecular and cellular biology, evolution, organ systems (neural, endocrine, cardiovascular, respiratory, immune, etc.) and the environment, students gain insight into how these aspects work together in a variety of ways. Students in this concentration also learn to apply principles from mathematics, chemistry and physics. Discoveries are made at the laboratory bench and in the field, and students in the concentration are encouraged to participate in research projects in the labs of our faculty members.

This program is available as an accelerated degree program:
https://sols.asu.edu/degree-programs/accelerated-bachelor-master-science.

Due to the high volume of overlap in curriculum, students enrolled in this degree are not permitted to declare a concurrent degree combination with any other School of Life Sciences program or with the Bachelor of Science degree in biochemistry from the School of Molecular Sciences. Students should speak with their academic advisor for any further questions.
At a Glance

- **College/School:** [The College of Liberal Arts and Sciences](#)
- **Location:** Tempe campus

- **Additional Program Fee:** Yes
- **Second Language Requirement:** No
- **First Required Math Course:** MAT 251 - Calculus for Life Sciences
- **Math Intensity:** Moderate

Accelerated Program Options

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's and master's degree with:

- [Biology (Biology and Society), MS](#)
- [Biology, MS](#)
- [Global Management (Creative Industries and Design Thinking), MGM](#)
- [Global Management (Digital Audience Strategy), MGM](#)
- [Global Management (Global Affairs), MGM](#)
- [Global Management (Global Business), MGM](#)
- [Global Management (Global Development and Innovation), MGM](#)
- [Global Management (Global Digital Transformation), MGM](#)
- [Global Management (Global Entrepreneurship), MGM](#)
- [Global Management (Global Health Care Delivery), MGM](#)
- [Global Management (Global Legal Studies), MGM](#)
- [Global Management (Integrated Health Care), MGM](#)
- [Global Management (Nonprofit Leadership and Management), MGM](#)
- [Global Management (Public Administration), MGM](#)
- [Global Management (Public Policy), MGM](#)
- [Global Management (Sustainability Solutions), MGM](#)
- [Global Management (Sustainable Tourism), MGM](#)
- [Global Management, MGM](#)
- [Microbiology, MS](#)
Molecular and Cellular Biology, MS

Acceptance to the graduate program requires a separate application. During their junior year, eligible students are advised by their academic departments to apply.

Admission Requirements

General University Admission Requirements:
All students are required to meet general university admission requirements.

Change of Major Requirements

A current ASU student has no additional requirements for changing majors.

Students should refer to https://changemajor.apps.asu.edu for information about how to change a major to this program.

Transfer Options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU™ to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and help students save time and money in their college journey. Students may learn more about these programs by visiting the admission site: https://admission.asu.edu/transfer/pathway-programs.

Global Opportunities

Global Experience
When studying abroad, students are able to engage in community service and outreach all around the world, which can help their graduate and professional program applications stand out. Students experience unique biological environments and gain an understanding of worldwide differences in the human condition. Study abroad programs exist across the globe, including a summer in Panama and a year in Ireland. https://goglobal.asu.edu/

The College of Liberal Arts and Sciences recommends the following study abroad programs for students majoring in biological sciences with a concentration in neurobiology, physiology and behavior: https://mystudyabroad.asu.edu/students/major/sls/neurobiology-physiology-behavior.
Career Opportunities

The broad education and critical-thinking skills students receive in this concentration are applicable to a variety of rewarding careers. Premedical, preveterinary and predental students get the background and courses needed for professional school application and beyond. Many students go on to graduate school for academic, teaching or research careers in areas such as:

- endocrinology
- environmental or behavioral physiology
- human physiology
- metabolism
- neurobiology
- social behavior

With a Bachelor of Science degree in this concentration, graduates have opportunities for technical positions in hospitals, research institutes and industry (food, dairy, chemical, pharmaceutical and biotechnology) as well as in government laboratories and agencies. The most important skills students learn in the concentration are critical thinking and problem-solving skills that can be applied to many scientific problems and professions as well as to the challenges of daily life.

Career examples include but are not limited to those shown in the following list. Advanced degrees or certifications may be required for academic or clinical positions.
