Economics (Politics and the Economy), BS  

Economics examines how societies, businesses and individuals deal with scarcity. This concentration adds the insights of political science to policies such as antitrust, taxation, environment and health care. Understanding the connections between these fields can prepare you to appreciate and engage in economic and public policymaking decisions.

Program Description

The concentration in politics and the economy serves undergraduate students in the BS program in economics who wish to pursue careers in business, economic and political consulting, political science, law and government.

In addition to coursework drawn from economics, the concentration also requires coursework that highlights the impact of government policies on the economy and the conditions under which government interventions may be warranted. Students take political science courses that provide a deep understanding of political processes and institutions as well as methodologies for understanding that behavior.
