Environmental Humanities, Certificate

LAENHCERT

Explore the relationship between human culture and the environment from a humanities-based perspective. You'll gain both theoretical and practical knowledge of the relationships between humans and the rest of nature, and will be better prepared to engage in activities that lead to meaningful social and environmental change.

Description

The environmental humanities certificate offers students who are interested in humanities-based approaches to the current global environmental crisis an option to focus in this vital area of study. Courses are focused wholly or in large part on the human relationship to the environment and the relationship between nature and culture. To gain practical experience, certificate students also complete a required English internship in environmental activism, policy development, education or another pertinent area.

ASU's Department of English has an extensive internship program, offering placements in publishing, media and marketing, government, nonprofits and film festivals. The department also boasts top online programs, rigorous undergraduate research opportunities and options for cultural and community involvement.
