Transborder Chicana/o and Latina/o Studies (Transborder Community Development and Health), BA

LATCLTBA

Students in this program acquire skills and tools to advance health equity among Chicana/o and Latina/o communities in the U.S.-Mexico borderlands. They'll learn to apply recent theoretical advances to understand social determinants of health and transnational communities. Partnered with faculty, students will conduct research on health and population ecology.

Program Description

The BA degree program in transborder Chicana/o and Latina/o studies focuses on the political, cultural, economic, sociological, historical, psychological and artistic experiences of Mexican-origin and Latina/o populations in the United States and the U.S.-Mexico transborder region. Students will be able to understand the complexities of the Chicana/o and Latina/o experience on the U.S.-Mexico border and beyond, with implications for other border communities around the world.

In the transborder community development and health concentration students will focus their learning on the health inequalities and issues affecting Mexican-origin, Chicana/o and Latina/o communities. Students will also develop an understanding of the relationship between the places where people live, play, work and heal and the impact they have on people's health and well-being. Overall, students will be able to design, implement and evaluate community-based health programs.
