The world is changing with unprecedented speed. These changes impact the lives of everyone. Join a diverse student body, either online or on campus, to examine theory, practice and policy focused on the challenges facing governments, non-governmental organizations, communities and others around the world to meet the needs of societies.

**Program Description**

**Degree Awarded:** MS Global Technology and Development

The MS in global technology and development is a program covering international social, economic and political development. It highlights the variables of technology and innovation in these development processes and analyzes change within the context of the current era of globalization. One of the central concerns addressed in the program is the global disparity in wealth and access to resources and basic needs, both between and within countries. Students are encouraged to pursue unique research questions, in the developed or the developing worlds, which engage them in social science research on issues related to technology and human socioeconomic and political development. Students take theoretical, research, policy and regional studies courses to prepare for the master's degree culminating experience.

**At a Glance**

- **College/School:** School for the Future of Innovation in Society
- **Location:** Tempe campus or online

**Accelerated Degrees**

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's and master's degree with:

- Innovation in Society, BA
- Innovation in Society, BS
Acceptance to the graduate program requires a separate application. During their junior year, eligible students will be advised by their academic departments to apply.

**Degree Requirements**

30 credit hours including the required applied project course (GTD 593)

**Required Core (12 credit hours)**

- GTD 501 Global Technology and Development (3)
- GTD 503 Technology and the International Political System (3)
- GTD 505 Research Design in Technology and Development (3)
- GTD 506 Quantitative Analysis in Technology and Development (3)

**Restricted Electives (15 credit hours)**

**Culminating Experience (3 credit hours)**

- GTD 593 Applied Project (3)

**Additional Curriculum Information**

For the approved electives course list, students should contact the academic unit.

**Admission Requirements**

Applicants must fulfill the requirements of both the Graduate College and the School for the Future of Innovation in Society.

Applicants are eligible to apply to the program if they have earned a bachelor's degree from a regionally accredited college or university recognized by ASU in a related field such as political science, international relations, sociology, anthropology, economics, business, education, technology, engineering, life sciences, foreign languages or literature (i.e., topics related to global development, culture or socioeconomic institutions).

Applicants must have a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in the last 60 hours of a student's first bachelor's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. personal statement
4. two letters of recommendation
5. proof of English language proficiency

Additional Application Information
An applicant whose native language is not English (regardless of current residency) must provide proof of English proficiency. A TOEFL score is required. Applicants should visit https://students.asu.edu/graduate/proficiency for more information.

Attend Online
ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program description and request more information here.
