Psychology, BS

You'll study the mind and behavior while building skills in critical thinking, quantitative research and writing. Gain practical experience as well!

Program Description

Psychology is the scientific study of mind and behavior. This program emphasizes critical thinking, reasoning, and quantitative research and writing. It adds practical experience through internships, service-learning and faculty-supervised research. The BS program has a greater science focus than the BA, and thus includes two more required lab sciences as well as precalculus. The Bachelor of Science program prepares students for employment or prepares them for graduate study in quantitative, experimental and biological psychology and related fields (e.g., medicine and behavioral neuroscience).

Admission Requirements

General University Admission Requirements:
All students are required to meet general university admission requirements.

Change of Major Requirements

A current ASU student has no additional requirements for changing majors. Students should refer to https://students.asu.edu/changingmajors for information about how to change a major to this program.

Transfer Agreements

ASU has partnered with colleges and universities in Arizona, California, Illinois and Washington to provide transfer curriculum pathways. Students should select their current institution to see if there is a partnership agreement between the institution and ASU for this degree program. Students who do not see their state or institution listed should check back as ASU is always working on creating new partnerships.
Global Opportunities

Global Experience

With over 250 programs in more than 65 countries (ranging from one week to one year), study abroad is possible for all ASU students wishing to gain global skills and knowledge in preparation for a 21st century career. Students earn ASU credit for completed courses, while staying on track for graduation, and may apply financial aid and scholarships toward program costs. Career Opportunities

The Bureau of Labor Statistics shows that the job outlook (2014-24) for psychologists is 19% (which is "much faster than average").

A degree in psychology prepares students for a career in various settings:

- community centers
- consulting firms
- government (sales and marketing, human resources management)
- industries and organizations
- hospitals
- mental health professions (youth counselor, substance abuse counselor, behavioral health technician)
- private companies
- schools and colleges (school psychologists, educators, professors)
- social services (high school psychology teacher, occupational analyst)
- substance abuse treatment clinics

The degree program also provides an excellent foundation for graduate study in fields such as public administration, law, family studies, communication and the various graduate program fields in psychology:

- clinical and counseling
- cognitive neuroscience
- developmental
- environmental
- experimental
- physiological
- social

Career examples include but are not limited to those shown in the following list. Advanced degrees or certifications may be required for academic or clinical positions.
