Obesity Prevention and Management, MS

NHOBMS

ASU is no longer accepting new students to this program. Please explore Degree Search for other similar program options.

Develop an in-depth and multidisciplinary understanding of obesity. With your background in psychology, nursing, health and wellness, exercise and nutrition sciences, or other health-related field, you will be ready to make an impact on the prevention and management of obesity in work-site, health care, school and community settings.

Program Description

Degree Awarded: MS Obesity Prevention and Management
The MS in obesity prevention and management is an innovative degree program that draws on a wide array of expertise at ASU. The curriculum is designed to integrate perspectives from the social, applied, life and health sciences and provides advanced, graduate-level, problem-focused, experiential training that is grounded in evidence and best practices for effective prevention and management of obesity.

This degree program is geared toward postbaccalaureate students and professionals who wish to advance their understanding of the social, cultural, environmental, health and psychological issues associated with obesity. The program emphasizes the complex etiology of obesity and includes courses that will enhance students' ability to work with individuals and populations at risk of obesity to develop effective strategies for prevention and management of the condition across the lifespan.

behavior change, research methods and statistics.

Additional elective course selections depends upon the student's chosen track. Students select six credit
hours from prescribed categories for each track and six credits from the following categories: cultural
aspects of behavior change, general track, public health approaches for behavior change, and
technological approaches for behavior change.

Admission Requirements

Applicants must fulfill the requirements of both the Graduate College and the College of Health
Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's (or equivalent) or master's
degree in social or health science-related fields from a regionally accredited institution. The following
entry-level competencies are needed for admission to the program: Students should have completed
undergraduate-level coursework in statistics and psychology and, ideally, have completed one or more
courses in nutrition, physiology and chemistry.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of
their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale
is 4.00 = "A") in an applicable master's degree program.

All applicants must submit

1. graduate admission application and application fee
2. official transcripts
3. GRE scores (verbal, quantitative and analytical)
4. statement of educational and career goals
5. writing sample
6. letters of recommendation
7. proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

Students who have an undergraduate GPA of 3.25 or higher in the last 60 hours of their undergrad program may have the GRE requirement waived with approval of the academic unit.

No foreign language examinations are required for admittance to the program.

Writing sample: A two- to three-page application letter is required in which applicants explain why they want to pursue this degree and why they feel well-prepared to succeed in this graduate program.
