Sports Science and Performance Programming, BS

Do you love sports? Are you interested in helping people reach their peak performance --- safely? Learn the art and science of maximizing human performance across competitive and intense environments.

Program Description

Supporting individuals at close to maximal effort requires specialized knowledge and skills. The BS program in sports science and performance programming prepares students to work with participants whose objective is maximizing their performance potential in sports, occupational and tactical environments.

The National Strength and Conditioning Association has identified a need for sports performance and tactical performance specialists to be more knowledgeable about human physiology and movement mechanics and the technologies used to provide feedback to coaches and participants. Graduates understand how to push the limits of performance in sports and tactical situations as well as the stress the body undergoes during training for sports, work or recreational activities, enabling them to plan successful exercise and recovery programs.

Graduates are prepared to pursue certification as a strength and conditioning specialist or a tactical strength and conditioning facilitator through NCSA, to work in the sports performance field, or for graduate study in sports science programs.

**Change of Major Requirements**

A current ASU student has no additional requirements for changing majors.

Students should refer to [https://changemajor.apps.asu.edu](https://changemajor.apps.asu.edu) for information about how to change a major to this program.

---

**Transfer Options**

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use MyPath2ASU™ to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and help students save time and money in their college journey. Students may learn more about these programs by visiting the admission site: [https://admission.asu.edu/transfer/pathway-programs](https://admission.asu.edu/transfer/pathway-programs).

**Global Opportunities**

**Global Experience**
Students studying sports science and performance programming work to push the limits of peak sports performance. When studying abroad, students gain valuable skills in leadership, communication and critical thinking, which they can use to push the limits of their personal knowledge and experience. Study abroad allows students to stand out in a competitive field and leads to cultural enrichment and competency. [https://goglobal.asu.edu/](https://goglobal.asu.edu/)
Career Opportunities

Career options for this degree include opportunities in sports performance training in high school, collegiate, professional and private sector markets. In addition, students are prepared for careers in tactical performance training with local, state and national governmental agencies including work with police, firefighters and military personnel.

Career examples include but are not limited to those shown in the following list. Advanced degrees or certifications may be required for academic or clinical positions.
