If you want to help create healthy, sustainable communities, the BS program in community health is designed for you. Community health professionals work in partnership with private and public organizations to address health needs of diverse populations by providing advocacy, capacity building, service coordination, education, monitoring, evaluation and interventions within a community setting.

**Program Description**

The BS program in community health is designed for students who want to create healthy, sustainable communities. Changes to the health care system call for an increased number of community health professionals who can advocate for individuals, families and communities as well as provide health education services. Graduates of this program provide health education, health promotion, care coordination, disease management, health care navigation and advocacy services for individuals, families, and communities.

This degree program has the same prerequisites as the nursing major; therefore, students may transition seamlessly to this program and obtain a bachelor's degree in a health-related field.
