Nursing, BSN

NUNURDBSN

Nursing is at the forefront of our changing health care system. This degree program will prepare you as a professional nurse with the theoretical foundation and clinical competence to thrive in various health care settings. You will be prepared to think critically, use evidence to make decisions, work collaboratively and innovate in interprofessional health care environments.

Program Description

Through a curriculum centered upon evidence-based practice, clinical reasoning, innovation, interprofessional communication and information technology, the BSN degree program prepares students to provide high-quality professional nursing care. The Bachelor of Science in Nursing may be earned through several unique pathways.

Prelicensure Nursing Programs:

The College of Nursing and Health Innovation offers two prelicensure tracks that lead to a Bachelor of Science in Nursing: the traditional prelicensure clinical nursing program and the postbaccalaureate clinical nursing program.

Students pursuing advancement to the traditional prelicensure clinical nursing program complete prerequisite coursework and request advancement to the upper-division nursing program. The upper-division nursing program may be completed in a 16-month year-round schedule or a 24-month academic year schedule. Students admitted directly into a traditional prelicensure clinical nursing program must meet continuing eligibility criteria to advance to the upper-division nursing program. Directly admitted nursing students who do not meet continuing eligibility criteria, transfer students, or students who are changing majors may apply for advancement to the upper-division nursing program, competing for any remaining spaces.

Students pursuing advancement to the postbaccalaureate clinical nursing program complete prerequisite coursework and apply for advancement to the 12-month upper-division clinical nursing program. Students are admitted to the postbaccalaureate nursing program annually in the spring semester.

Online RN to BSN program

The online RN to BSN program (https://bsn.asu.edu) is available to students who have earned an associate degree in nursing or a nursing diploma and have a current RN license in good standing with the Board of
Nursing. The RN to BSN program courses are offered online in 7.5-week sessions and can be completed in 14 to 24 months. There are five starts per year: twice in the fall, twice in the spring, and once in the summer. Assignments vary from course to course and may include readings, papers, presentations and practice application activities completed in the student's geographic area. Transfer pathway agreements are in place with all community colleges in Arizona, which provide additional benefits to students. The RN to BSN program does not have approval from the Boards of Nursing in Tennessee, Rhode Island or Washington to be offered to RNs licensed in those states. More information can be found at https://bsn.asu.edu.

Concurrent Enrollment Program

The concurrent enrollment program pathway is offered through participating community colleges. This program is designed for qualified nursing students who are interested in earning their Bachelor of Science in Nursing while simultaneously pursuing their AAS in nursing. Selected students will be enrolled in the community college program and ASU RN to BSN courses concurrently. RN to BSN courses taken at ASU will be delivered in an online format.

Eastern Arizona College Partnership

The ASU and Eastern Arizona College partnership has two options: the concurrent enrollment program and the RN to BSN. The concurrent enrollment program is designed for qualified students pursuing an Associate of Applied Science in nursing from EAC while simultaneously earning a Bachelor of Science in Nursing from ASU. Another option allows students with an associate degree or diploma in nursing to pursue the ASU BSN at Eastern Arizona College on the Thatcher campus. Courses in this program are delivered in a hybrid format.

Students should see https://transfer.asu.edu/thegilavalley for more information about ASU degrees offered through ASU@TheGilaValley.

- **Second Language Requirement:** No
- **First Required Math Course:** MAT 142 - College Mathematics
- **Math Intensity:** General
Admission Requirements

General University Admission Requirements:

All students are required to meet general university admission requirements.
Freshman | Transfer | International | Readmission

Additional Requirements:

The admission standards for majors in the College of Nursing and Health Innovation are higher than minimum university standards. Freshmen admission requirements: top 25 percent of high school graduating class OR 3.30 GPA in ASU competency courses (based on 4.00 grading scale) AND either a 24 ACT combined score OR an 1100 SAT (prior to March 2016) or 1170 SAT (March 2016 and later) combined evidence-based reading and writing plus math score.

Freshmen should select an additional major when applying for admission.

English language proficiency for applicants whose native language is not English:

- minimum score of 540 (paper-based), 207 (computer-based), or 76 (Internet-based) on the Test of English as a Foreign Language (TOEFL).
- minimum overall band of 6.5 with no band below 5.5 on the International English Language Testing System (IELTS).

Students not admissible directly to the BSN Nursing program will be placed into the BS program in community health.

Change of Major Requirements

Current ASU students interested in changing to this program would need to apply for the upper division clinical nursing program through an advancement application process. Space is limited, and selection is based upon GPA and score earned on the Test of Essential Academic Skills. Students should contact an advisor in the College of Nursing and Health Innovation for more information on how to change a major to this program.
Attend Online

ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program description and request more information here.

Transfer Options

ASU is committed to helping you thrive by offering tools that allow you to personalize your transfer path to ASU. Students may use the Transfer Map search to outline a list of recommended courses to take prior to transfer.

ASU has transfer partnerships in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools, and resources and help students save time and money in their college journey. Learn more about these programs by visiting the Admissions site.

Global Opportunities

Global Experience

With over 250 programs in more than 65 countries (ranging from one week to one year), study abroad is possible for all ASU students wishing to gain global skills and knowledge in preparation for a 21st century career. Students earn ASU credit for completed courses, while staying on track for graduation, and may apply financial aid and scholarships toward program costs. https://mystudyabroad.asu.edu/.

Career Opportunities

Graduates deliver nursing care to individuals, families and communities. Completion of this degree program also prepares individuals for entrance into graduate study in nursing at the master’s or doctoral degree levels, which is essential for teaching, administration, clinical specialization and research.
Career examples include but are not limited to those shown in the following list. Advanced degrees or certifications may be required for academic or clinical positions.
