If you want to generate new knowledge and design new ways to address sustainability challenges, this master's degree program prepares you for designing and conducting transdisciplinary sustainability research.

**Program Description**

*Degree Awarded: MS Sustainability*

The MS program in sustainability is a research-oriented degree program that culminates with research writing, either a thesis or capstone in the form of a publishable scientific paper.

The program focuses on knowledge generation and designing new ways to address sustainability challenges and prepares students for designing and conducting transdisciplinary research. Although the graduate degree programs emphasize the integration of a broad range of expertise in student training, this master's degree program is best suited to students inclined toward natural sciences, economics, engineering or related fields, and who are interested in a career in research or academia.

Students learn how different disciplines view and approach the challenges of sustainability in theory, research and practice. They develop the academic and technical skills as well as the ethical insights that help them understand, research and provide solutions to complex sustainability challenges at the local, regional, national and global levels.

All sustainability graduate students possess an understanding of the need for a transdisciplinary approach to solving sustainability challenges, the ability to communicate their work to professionals in other disciplines and to policymakers and the general public, and the breadth of vision to recognize the interconnectedness of
social, economic, environmental and technical systems. They apply critical-thinking skills to approach sustainability challenges from a systems perspective, the skills needed to work effectively in transdisciplinary teams, and the technical skills required to formulate and solve problems at the appropriate scale.

Interested students may learn more about careers in sustainability and where graduates of the Master of Science in sustainability are now employed here:

At a Glance

- **College/School:** School of Sustainability
- **Location:** Tempe campus

Degree Requirements

37 credit hours and a thesis, or
37 credit hours including a capstone course (SOS 596)

**Required Core (16 credit hours)**
- SOS 510 Perspectives on Sustainability (3)
- SOS 520 Research Design and Methods for Sustainability (3)
- SOS 525 Social-Ecological-Technical Systems (SETS): Domains and Interfaces (3)
- SOS 581 Synthesis for Sustainability Research (3)
- SOS 589 Community of Graduate Student Scholars (1)

**Electives (15 credit hours)**
- methods (3)
- normative dimensions of sustainability (3)
- general electives (9)

**Culminating Experience (6 credit hours)**
- SOS 596 Capstone: Scientific Paper (6) or
- SOS 599 Thesis (6)

**Additional Curriculum Information**
- SOS 589 is taken over four semesters, for four credit hours total.
The taught-course element of the program is evaluated through course-specific examinations, research papers or applied projects and is considered to have been successfully completed if the student obtains a GPA of 3.25 (scale is 4.00 = "A") or higher. Graduate College policies and procedures for fulfillment of degree requirements also must be met.

Approved general electives prefixes include, but are not limited to, the following: SOS, ASB, ART, PAF, SGS, POS, SOC, PSB, PGS, PHI, COM, CPP, CRD, ESS, PGV, NTR, MCO, GCU, SCM, HPS, HST, JHR, JMC, JUS, LAW, LES, PUP, SBS, RTM, STS, TDM, and URB.

**Admission Requirements**

Applicants must fulfill the requirements for both the Graduate College and the School of Sustainability.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree, in any field, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. statement of intent
4. GRE scores
5. three letters of recommendation
6. resume or curriculum vitae
7. proof of English proficiency

**Additional Application Information**

An applicant whose native language is not English (regardless of current residency) must provide proof of English proficiency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program and describe how completion of the degree will support long-term career goals. The statement should elaborate on key research questions the applicant wishes to address or problems to solve as part of the plan of study, and it should identify potential faculty advisors.
Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

**Global Opportunities**

**PLuS Alliance**

**Global Experience**

Students may also participate in a study abroad program (https://schoolofsustainability.asu.edu/student-life/study-abroad/) or apply to participate in the Global Development Research Program (https://sustainability.asu.edu/global-development-research), which works in conjunction with this program. Many students in the master's degree program in sustainability also conduct research abroad as part of their culminating experience.
