Global Management (Global Digital Transformation), MGM

Customize the world's No. 1-ranked MGM degree (Times Higher Education/Wall Street Journal, 2019) with digital skills in marketing, design, product development, automation and data analytics. With a concentration in global digital transformation, you're prepared to lead the way in global industry 4.0.

**Program Description**

**Degree Awarded:** MGM Global Management (Global Digital Transformation)

Thunderbird designed the STEM-designated* global digital transformation concentration within the MGM degree program for students interested in augmenting their digital skills in the areas of management consulting, marketing, design and product development. Students can tailor this cutting-edge academic concentration to fit their specific learning goals. Through collaborative courses offered in partnership with other ASU colleges, students may combine the global management skills gained in the Master of Global Management with digital expertise to create a dual specialization that will continue to be in high demand throughout the global economy.

**A new brand of leadership: global, digital, cross-sectoral, transdisciplinary.**

The World Economic Forum reports that empathy and collaboration are two critical abilities for a global manager's success. These abilities are equally critical for those seeking careers in global digital transformation. They are skills that rely on the development of social capital. This program is designed to develop a student's social capital through field-based action learning, team-based projects and stretch assignments. Students can build sustainable trusting relationships --- the basis of social capital --- with others from diverse parts of the world. By developing a deep capacity for intercultural empathy, mastering interpersonal communication and negotiation skills, and cultivating the ability to act with diplomacy, graduates are prepared to take on a leadership role in a global organization.

Digital transformation leadership is a highly sought after expertise. However, technical skills need to be supplemented with a strong repertoire of management and collaboration skills. The Master of Global Management program with a concentration in global digital transformation expands students' choices of electives and fuses technological skills with managerial skills. In this concentration, students combine the
global management skills of the Master of Global Management with digital expertise by specializing in the various pathways of global digital transformation through program coursework and applied learning projects guided by our faculty experts.

*As a bonus for international students, this program meets special F-1 international student status requirements. This means that international students who graduate with the global digital transformation concentration qualify for a 24-month extension to their Optional Practical Training in the United States beyond the 12 months already provided to international students in non-STEM degrees.

Thunderbird School of Global Management has produced unique leaders for more than 70 years, leaders in every sector capable of tackling the world's greatest challenges. The alumni network comprises 45,000 graduates and 170 chapters around the globe.

Additional Curriculum Information
Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, other requirement courses may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the Master of Global Management degree program. Students whose native language is not English and who meet the admission requirements for the program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency by waiving this requirement through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives.

Admission Requirements

Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor’s or master’s degree in any subject or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor’s degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master’s degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. resume
4. essay response to application question
5. one professional or academic reference
6. GMAT or GRE may be required
7. interview
8. proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

The resume should demonstrate the applicant’s professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Applicants are exempt from taking the GMAT or GRE if they have eight or more years of professional work experience or a cumulative undergraduate GPA of 3.25 or above. Applicants who do not meet either requirement are reviewed by the application committee and may receive an exception on a case-by-case basis.

Global Opportunities

Global Experience
Students in Thunderbird's MGM program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level. Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve real-world challenges by collaborating with the school's corporate partners around the world. Some options include:

Global Field Seminars
This two- or three-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders as well as with Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills so they can become major assets to any organization they join after graduating.

Thunderbird Global Challenge Laboratories
This is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations and plans for sustained growth that are both practical and effective. For more information, students should visit https://thunderbird.asu.edu/challenge-labs.
Career Opportunities

Digital marketing is expected to have an 11% compound annual growth through 2021 (Forbes). Similarly, advances in technology have made programming and data analysis accessible to individuals with less advanced technical training. This has created a class of hybrid jobs that combine digital skills with marketing and design (Burning Glass). The World Economic Forum, Future of Jobs Survey and the Jobs of the Future report by McKinsey Global Institute 2017 listed transdisciplinary, new media literacy and virtual collaboration as important job skills for the future.

Career examples include:

- intelligence analysts
- logistics analysts
- management analysts
- marketing managers
- market research analysts and marketing specialists
